

## SPECIFICATION

Trim-A-Slab Ramp  
Sidewalk offset mitigation  
June 2026

Maintenance of large amounts of concrete path infrastructure requires assessment and management of slab-to-slab displacement at every slab joint. While ADA specifications may be useful guidance in some instances, management of gaps and offsets often falls to local authorities, property managers, or neighborhood associations.

In an effort to provide more options and flexibility in these efforts, Trim-A-slab Ramp was developed with the input of city managers to improve the condition of sidewalk infrastructure short of slab leveling, which is a time consuming and costly process. Trim-A-Slab Ramp will provide a transition between slabs of varying height, reducing trip hazards between slabs that have settled differently over time.

Trim-A-Slab Ramp is designed for exterior applications in residential and commercial sidewalks where a vertical offset between adjacent slabs is up to 1" tall. Trim-A-Slab Ramp can be used with either rounded edge or sharp-edged slabs; it anchors itself between the slabs with flexible beam-like elements at its lower extremity. Trim-A-slab Ramp will fit in joints from 0.4 to 1-1/8" wide.

## SPECIFICATION

Trim-A-Slab Ramp  
Sidewalk offset mitigation  
June 2026

Trim-A-slab Ramp is self-supporting and can take traffic immediately after installation. Trim-A-Slab Ramp will support pedestrian and bicycle traffic, as is typically found in residential sidewalk applications.

Trim-A-Slab Ramp is compatible with the use of a supporting fill such as sand below the product to provide additional support, if desired.

Standard lengths of 5 ft ship from stock, available in black. Please contact us for custom color or length quotations. Trim-A-Slab is proudly made in USA and is protected by US patent. See [www.trim-a-slab.com](http://www.trim-a-slab.com) for more information.

### Material specifications:

Material: 85-95 Durometer Flexible PVC with UV inhibitors

Installation temperature range: -10°F to +130°F

Life: 5+ years

### Limited Warranty

Trim-A-Slab Ramp is warranted to be free of defects in materials or workmanship at the time of shipment and is further warranted to retain color and structural integrity for a period of 5 years. Changes in length are expressly exempt from any warranty. Trim-A-Slab will replace or refund, at its discretion, any material proven to be defective. No warranty or claim is made as to the suitability of Trim-A-Slab Ramp in specific applications.

### California Prop 65

Trim-A-Slab contains Pthalates. 

WARNING: This product can expose you to chemicals including Phthalates which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).
